

## SENIORNET IPG MARCH 2021 REPORT SUMMARY

### THE MUSIC INTRO

We opened with our usual music intro:- The Crooners Lockdown

<https://youtu.be/USlj6mtX4QI?list=RDMMUSlj6mtX4QI>

### THE AED

We had a closer look at the Senionet AED “Automated External Defibrillator” just to familiarize just opening the box, slightly trickier than you might think!

The winner of our on-line question in our flyer for this month was Grant Nunes-Vaz, a biscuit awaits

### HEIC

Rod talked and gave us some insight into HEIC (high efficiency) what does it mean for us? With photos for example, this gives us more capacity as these files compress more efficiently

<https://setapp.com/how-to/convert-heic-to-jpg-on-mac>

### WIDGET

Just what is a “widget” slide finger on screen from your home screen left to right

<https://support.apple.com/guide/iphone/add-widgets-to-the-home-screen-iphb8f1bf206/ios>

<https://www.macworld.com/article/3440681/with-ios-13-1-shortcuts-gets-a-lot-more-powerful.html>

### SHORTCUT APP

Shirley showed us features with “backtap” with the “Shortcut App” and without using shortcuts

<https://www.macworld.com/article/3440681/with-ios-13-1-shortcuts-gets-a-lot-more-powerful.html>

### MUSIC RECOGNITION

Stuart offered another novelty item that is already within our Control Centre options (IOS 14.4)

“Music Recognition” Find it:-Settings/control centre/music recognition. Hit the +

Return to Homescreen then flick up to find the Control Centre. While music is playing in the room or anywhere that the device can hear, hit the Icon, it should listen and then name the music played.

The App. Shazam

### FACEBOOK

A look through Security Setting with our expert Hilary. The what, the why, the how. Particularly our “Passwords” We must upgrade them? Never use the same for this App. and our Bank a/c

A glance as to just how to look at these reports going back for many months via Interest Groups part of the site

### APPS.LIST

Jim’s Master Apps. List Let’s keep adding to this fantastic list of the Apps. We all use in this group

## Swipe typing with QuickPath

Helen demonstrated Swipe. On an iPhone instead of typing out words with an individual tap for each letter, you hold down your finger and slide over to each letter. Requires iOS 13 or later. You can't use QuickPath on a normal iPad keyboard, but you *can* use it with the miniature floating version that appears when you pinch inward on the default widescreen keyboard. To stop using the floating keyboard, pinch outward on the keyboard.

<https://www.macworld.com/article/3432168/how-to-use-the-quickpath-swipe-keyboard.html>

Roger generally added loads of tips and tricks throughout the session helping us all. Told us about another music recognition App. that you cast hum any tune and it will try to title it.

Special thanks to: - Hilary for these notes. Jim sorting out the attendance list and money

Helen, Rod, Shirley, Jim, Roger & Hilary for their contribution to a lively interesting session

As ever, comments, complaints, suggestions to:- stuart.yank@gmail.com
